

# APIs

**Wellington Moreno**

Lead iOS Instructor, General Assembly

## LESSON

---

# LEARNING OBJECTIVES

- + **Describe** APIs and how to use them
- + **GET** data from an API using cURL
- + **Interpret** API documentation
- + **Acquire and Use** an API Key

## QUESTION

---

# WHAT THE HECK IS AN API?

**APIS**

---

**API**

Application Program Interface

# VIDEO

**APIS**

---

# **AN API IS:**

A way of communicating with a software system.

## GUIDED PRACTICE

---

# STUDYING AN API

<http://editor.swagger.io/#/>

# PAIR PRACTICE: PLAYGROUNDS

15 mins

## DIRECTIONS

1. Study the Twitter API.
2. Take 5 operations and make Swift function declarations that match the API.

***BONUS: Write out the Data Models too***

## DELIVERABLES

A Playgrounds file with your answers

## GUIDED PRACTICE

---

# MAKING API CALLS

<http://petstore.swagger.io/#/>

# PRACTICE: MAKING API CALLS

## DIRECTIONS

Make the following API calls:

- + Create a Pet
- + Update a Pet
- + Get a Pet
- + Delete a Pet
- + ***Bonus: Make the calls using cURL***

CODE

**10 mins**

**FYI**

---

# API KEYS

As a way of safeguarding against abuse, many APIs employ authentication mechanisms that require an API Key. You will need to sign up for an account in order to make requests.

# PRACTICE: DESIGN AN API

CODE

15 mins

## DIRECTIONS

Design a REST API that allows me to pre-order the iPhone

- + Sign in
- + Place the pre-order
- + View latest iPhone
- + Update shipping address
- + Sign Up
- + Check order status
- + Cancel my order

**BONUS:** Use Swagger Editor to write the API

---

## CONCLUSION

---

# TAKEAWAYS

## CONCLUSION

---

APIs allow your Apps to connect  
to other systems

## CONCLUSION

---

Use APIs to make your apps  
more interesting and provide  
richer user experiences

---
